ABSTRACT

AWN is an integrated mobile platform that unifies donations, volunteering, and campaign management for charities in Bahrain. The app allows users to explore verified charities, join campaigns, donate securely, and register for volunteer activities. Charities can easily manage updates, track activities, and engage their community. Built with FlutterFlow and powered by Supabase, AWN delivers a secure, organized, and responsive experience. By digitizing the traditional giving process, AWN improves transparency, boosts efficiency, and strengthens community participation in charitable work.

OBJECTIVES

- **Unify Charity Services:** Create a single platform that brings together charities, donors, volunteers, and joint big campaigns in one place.
- **Simplify Participation:** Enable easy donations, volunteer recruitment, and support requests through an integrated mobile app.
- **Enhance Impact:** Improve transparency, collaboration, and efficiency across Bahrain’s charity sector through a centralized digital system.

METHODS/DIAGRAMS/FIGURES

RESULTS

- **Unified Charity Platform:** A single mobile system that brings together donations, volunteering, charities, and big campaigns in one organized platform.
- **Improved Transparency & Efficiency:** Users can easily track donations, view campaign progress, and access verified charities, increasing clarity and trust.
- **Enhance Impact:** Improve transparency, collaboration, and efficiency across Bahrain charity sector through a centralized digital system.
- **Streamlined Charity Operations:** Charities can manage campaigns, volunteers, and updates from one dashboard, reducing manual work and improving overall coordination.

CONCLUSION & FUTURE WORK

AWN provides a unified and secure platform that integrates donations, volunteering, and campaign management in Bahrain. It enhances transparency and engagement through real-time updates and verified charity data, making the experience more trustworthy and accessible. Testing confirms the system is efficient, user-friendly, and supports the digital transformation of the charity sector.

In the future, AWN will expand with a web version for easier access, multiple language and accessibility features for wider reach, and advanced analytics to track donation trends. AI-driven tools will also personalize donation and volunteering opportunities for users.
